

# 5-6 YEAR OLDS, KINDERGARTEN

THE PRESCHOOL  
by THE INTELLIGENT GROUP

## About

The curriculum creates an environment that encourages exploration and discovery, fostering inquiry, language, and problem-solving skills. It engages children in stimulating interactions, integrate purposeful play for hands-on learning, and incorporate reading and new vocabulary to enhance literacy.

## Math

In the Kindergarten class, children dive into fun activities to learn counting, shapes, patterns and more. They will dive into simple and complex math operations like addition, subtraction, multiplication and division. Through hands-on play and interactive games, they build a strong foundation in math while developing problem-solving skills.

## Language

The language program in the Kindergarten class is engaging and interactive, designed to introduce young learners to fundamental language concepts. Through a variety of activities, songs, and games, children explore letters, sounds, and vocabulary, laying the foundation for early literacy skills. With a focus on hands-on learning, the language approach fosters a love for language and communication while nurturing the development of essential literacy skills in kindergarten students.
